PROFESSIONAL SUMMARY

Operations professional with experience in vendor performance management, fraud investigations, and customer escalations at Careem and Orange. Uses SQL, Excel, Google Sheets, and Power BI to analyze data, develop dashboards, and improve reporting. Combines over one year of fraud operations experience with current responsibility for vendor performance across Jordan and Iraq, supporting root cause analysis, service improvements, and informed operational decisions.

PROFESSIONAL EXPERIENCE

Vendor Operations Specialist
Aug 2026 - Present

Careem

- Manage vendor performance for voice and non-voice customer support across Jordan and Iraq, monitoring customer satisfaction (CSAT), quality, productivity, and service-level agreement (SLA) compliance.
- Analyzed repeat customer contacts and their causes, contributing to a **5% reduction in Iraq's contact rate** after relevant teams implemented recommended actions.
- Build vendor and agent performance dashboards to track results against targets, identify recurring SLA breaches, and guide corrective actions.
- Automate daily CSAT calculations and weekly reporting on pending escalations to reduce manual reporting and improve visibility of unresolved cases.
- Prepare root cause analysis reports for major escalations and stakeholder cases, documenting findings and the rationale for case-handling decisions.
- Investigate and validate escalations before referral to senior management; coordinate Uber-related cases and follow-up with relevant teams.

Senior Fraud Operations Associate
Jul 2025 - Jul 2026

Careem

- Investigated suspicious transactions, customer activity, and daily fraud alerts to identify patterns and support evidence-based risk decisions.
- Uncovered a recurring fraud pattern by investigating an unusually high rate of ride-hailing chargebacks and linking multiple disputed transactions to fraudulent driver (captain) accounts.
- Used SQL, Excel, and Google Sheets to analyze case evidence, identify trends, and document investigation findings and improvement opportunities.
- Contacted customers to verify chargeback-related transactions and coordinated with internal teams to assess validity, resolve escalations, and determine appropriate action.

Senior Technical Service Operations Associate
Jan 2025 - Jun 2025

Careem

- Investigated API integration issues and partner inquiries, coordinating resolution with engineering, finance, backend teams, and external partners within established SLAs.
- Developed SQL queries for operational reporting and created implementation guides and walkthroughs to support consistent issue resolution.
- Tracked integration issues and project progress, maintained stakeholder alignment, and escalated unresolved problems through defined channels.

PROFESSIONAL EXPERIENCE CONTINUED

Senior Safety & Security Operations Specialist Aug 2019 - Dec 2024
Careem

- Handled sensitive customer safety and security escalations by phone and email, assessing reported incidents and prioritizing timely action.
- Investigated customer claims, documented findings, and applied appropriate preventive measures, including account restrictions and blocking.
- Coordinated with internal stakeholders and external parties to track cases through resolution while maintaining service and documentation standards.

Postpaid Customer Service Specialist Jun 2016 - Jul 2019
Orange

- Resolved customer inquiries through clear, professional communication while maintaining service quality and information accuracy.
- Supported onboarding, shadowing, and knowledge sharing for new team members to promote consistent customer service practices.

TECHNICAL SKILLS

SQL: Data extraction, joins, aggregation, CASE WHEN, subqueries, date/time analysis, and multi-table analysis for operational reporting and pattern identification; experience with Trino.

Microsoft Excel: Power Query, Power Pivot, PivotTables, PivotCharts, advanced formulas, data validation, reconciliation, and operational performance analysis.

Google Sheets and Apps Script: Advanced formulas, pivot tables, dashboards, structured reporting, and reconciliation; automation of recurring data updates and reports developed with AI assistance.

Power BI: Data modeling, multi-page dashboards, drill-down analysis, and DAX measures developed with AI assistance.

Python and pandas: Exploratory data analysis, data cleaning, transformation, and manipulation.
